

Assessment Management

Are you longing for a better way to manage assessment and planning information?

WEAVEonline[®] is a web-based assessment system that helps manage accreditation, assessment, planning and quality improvement processes for colleges and universities. Developed by Virginia Commonwealth University, WEAVEonline is in use at more than 100 institutions of higher education.

WEAVEonline brings efficiency to assessment and planning management. It provides a platform that encourages exploration of challenging questions about institutional purposes and effects—especially effects on student learning.

WEAVEonline is maintained and continually enhanced by assessment, education, and planning professionals from across the country.

Institutions that use WEAVEonline have the ability to quickly and easily determine the progress of their programs' assessment practices in both the academic and administrative units.

The process follows a simple cycle of:

- ▶ Identifying program goals, objectives, outcomes, and establishing a criteria for success
- ▶ Measuring achievement
- ▶ Assessing the accomplishments and identifying gaps
- ▶ Planning actions for continuous improvement including necessary resource allocations
- ▶ Tracking the implementation of improvements over time

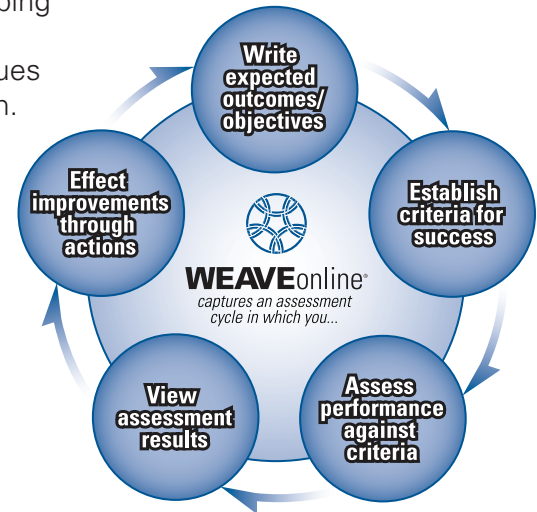

WEAVEonline is the perfect tool for tracking attainment of institutional priorities, strategic plan initiatives, General Education outcomes, or accreditation standards. A robust document repository provides instant access to external files for evidence, instruction, or assessment.

WEAVEonline, with its direct and straightforward user interface, is a perfect assessment management solution for institutions of all sizes and descriptions.

"With multiple campuses and numerous academic and non-academic programs, it was previously difficult to centralize and maintain all of the assessment efforts. WEAVEonline solved that problem and is allowing Greenville Technical College to centralize and promote a culture of on-going assessment throughout the entire institution. The flexibility and ease of entering data into WEAVEonline is an incredible advantage, as is the ease of interpreting the various reports we can generate, even for those not familiar with the system. I have yet to work with another company that can match the exceptional professionalism, knowledge, and customer service of the WEAVEonline staff."

Julie Allison
WEAVEonline Administrator
Greenville Technical College

Because WEAVEonline is a hosted application, subscribing institutions are free of any information technology issues related to using the solution. Hosting, server space, upgrades, maintenance, security, back-ups, and trouble shooting are all included in the subscription. This provides predictability in budgeting and simplicity for WEAVEonline campus administrators.

The easy-to-use curriculum mapping feature of WEAVEonline allows a graphical representation of curriculum delivery to program and institutional objectives with an analysis approach determined by the user. This feature is particularly useful in establishing a culture of assessment or when planning new programs.

Reports generated by WEAVEonline provide a user-defined level of transparency across the institution and, if so desired, to external agencies as well. This is of particular interest to institutions that are planning for a regional or professional accreditation review.
